Wall pannels **BOISERIE** design R&S PIANCA

Boiserie is a system of wooden panels that has the power to add style and distinction to any room thanks to its dual decorative and functional strengths.

Boiserie was designed to meet the tastes and requirements of all those looking for a unique way to customise their home. It offers the possibility of creating an endless array of arrangements and styles. The Boiserie panels can be integrated with shelves, platforms, bedside tables, units from the People and Spazio collections, the Domino bench and Pianca divan beds (i.e. without headboards). Very versatile in terms of dimensions and materials, they can creatively furnish any room of the home with their modern or classic style.

Their simple and linear basic design can be enriched by spacers in gold, bronze, titanium or in various wood types. The panels are available in the 20 matt lacquers of the Pianca collection, in wood (borgogna, black walnut, grey oak or natural) padded or even with the addition of quilted accessories that have been specifically designed for the bedroom. By adding led lights they can also offer their own, independent lighting.

Since the panels can be made-to-measure to the centimetre reaching a maximum width and height of 210 cm, our Boiserie system can cover any surface. For larger areas, simply put various panels together.

PIANCA

CHARACTERISTICS

STRUCTURE

Boiserie are composed by wooden wall panels (C) or upholstered wall panels (B) placed next to each other. Can be equipped with shelves, suspended modules (D), "C" modules, bases, benches, tufted covers (A), spacers, LED lights.

SOLID Boiserie structure made of wood particle-board panels wood veneered or lacquer on eco veneer. Can be equipped with tufted covers (A) except when they have light at the top.

HOLLOW Boiserie structure made of wood particle-board panels with 45° joint. Wood veneered or lacquer on eco veneer. Panels can also be supplied with supported slate.

UPHOLSTERED Boiserie 180-210 cm H can only be floor sitting. Leather and Eco-leather coverings are not removable.

The wall panels and the shelves attached to them can be custom sized in width and height at a 10 cm pace only.

PEOPLE SPACERS

They cannot be used with hollow or upholstered wall panels

2.2 cm Th.
W made to measure from 30 to 240* cm

* for wider composition, spacers will be joined in correspondence of the junction between the wall panels

ELETRIFICATION / LED lights

They are applied along the perimeter in the 1.2 cm empty space created between panel and wall. they are equipped with a concealed transformer housed at the back of the panel. the switch can be controlled from any residential switch or via the foot pedal provided.

We do not recommend using vertical lights on modules and solid wall panels with spacers.
