BRIDGE ELEMENTS

The bridge elements can be combined with wing door modules or sliding door modules internal door only. The doors of a bridge element have the same thickness as the wardrobe's wing doors. As a consequence they do not need any handle; the handle function is performed by a protrusion on the lower side of the door. For this reason Plana doors can be used with the Tratto and Nastro wood doors, whereas the Cornice doors can be used also with the Link doors.
